GHG emissions reduction of CO2 equivalent each year

2.2-3.1M

Estimated number of direct, indirect, and induced jobs created¹

2.2M

Number of additional outstanding MSME loans, of which 1.4 million are to women

\$11.2B

Volume of additional trade finance supported

496k

Additional farmers reached

34.5M

Number of additional direct fixed/mobile internet connections

¹ Employment estimates are computed for individual projects using IFC's economic impact estimation framework. The framework comprises sector-specific models and a variety of assumptions across countries and sectors. For financial intermediaries, the estimate includes on-lending of IFC funds only. Client banks' portfolios grow more than the IFC funding alone, partly because IFC's contribution catalyzes additional funding and partly because the growth is contractually agreed with IFC. This additional expansion, which is hard to attribute precisely, could represent the creation of several million jobs.
