## Product Features

### 01.ID-based Pre-screening

Thorough scrutiny on customer's ID, mobile, email address for early anomaly detection, including invalid format, forged certifications, to deduce operation cost

### 02.Overall Risk Scan

UpToDate **blacklist** for multi-dimension risk detection checking upon ID, mobile, and email address, to reveal derogatory or other high risk records (court, tax bureau, leasing delinquencies etc.) for new finance, bank, other non-financial institutes

### 03. Cross platforms/institutions excessive applications

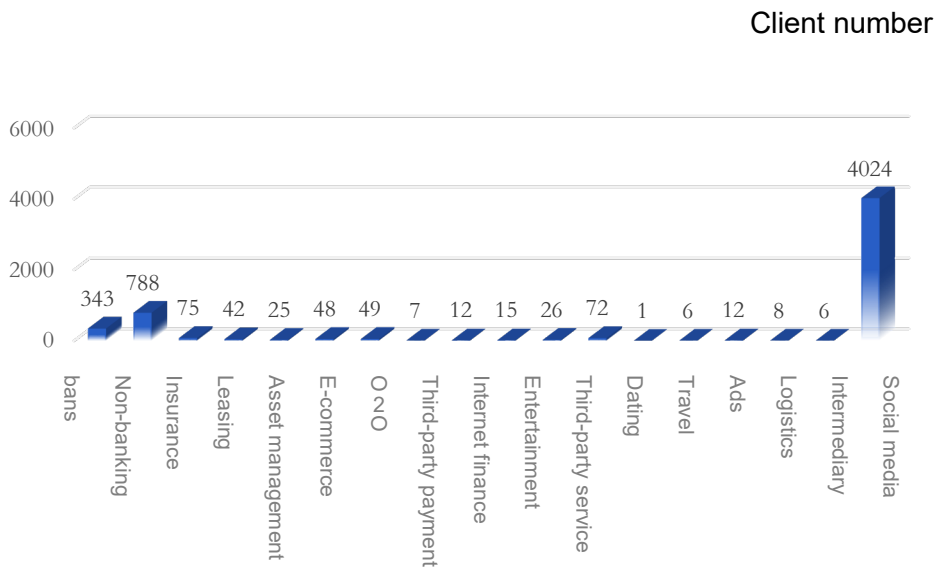

Through joint prevention and control mechanism, identify high default risk applicants of excessive applications over multiple platforms/institutions

### 04. Group Fraud Detection

Through device fingerprint and dynamic anti-fraud modeling technics, to detect group fraudulent behaviors (identify abnormal/fake phone/ID/device fingerprint etc.) to reduce group fraud
